DETAILED ACTION

1. The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group **Art Unit 2614**.

2. This communication is responsive to the preliminary amendment filed 03/23/2006.

Election/Restriction

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Claims 1-19 and 40-44, drawn to a method of associating a computer terminal of a user with a communications device operable by the user within a computer system;
- II. Claims 20-36 and 39, drawn to a method of associating a computer terminal with a telephone terminal in a distributed computer system via a communications network, the computer terminal being associated with a unique computer identity and the telephone terminal being associated with a unique telephone terminal identity;
- III. Claims 37-38, drawn to a method of registering the identity of a telephone terminal in association with the identity of a computer terminal;
- IV. Claims 45-50, drawn to a method of automatically associating a computer terminal of a user with a telephone terminal of the user within a computer system.

Art Unit: 2614

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. **Currently, no claim has been found to be generic.**

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
